- Many new wheels have a Flangless rims which result in having to use an Adhesive (stick-on) weight, to be used with a Clip-On on the inside Flange. Or used as a stand alone balancing weight.

- Using a rim gauge is increasingly important to be sure to have the correct fitment.

- This Guide for applications is a reference only. As Manufacturers may have different requirements per Country. Also due to a growing aftermarket for rims, its recomended to use a Rim Gauge or use an Adhesive if there are any uncertainties of fitment.

WHEEL WEIGHT APPLICATION CHART
